PROFESSIONAL EXPERIENCE

Frontend Developer

Badan Informasi Geospasial (BIG)

Directorate of Geospatial Information Standards and Technology

2024 – Present | Bogor, Indonesia

- Develop and maintain enterprise web applications supporting Indonesia's national geospatial information services.
- Design and develop responsive Single Page Applications (SPA) using Vue.js and Quasar Framework.
- Integrate frontend applications with RESTful APIs and enterprise backend services.
- Collaborate with cross-functional teams, including backend engineers, GIS specialists, QA engineers, and infrastructure teams.
- Participate in feature planning, implementation, deployment, and production support.
- Support Docker, Linux, PostgreSQL, and Nginx production environments.
- Develop applications integrated with ArcGIS Enterprise.

SELECTED PROJECTS

PTIG – Integrated Geospatial Services Platform

Frontend Developer

Website: <https://ptig.big.go.id>

Enterprise e-commerce platform for purchasing official geospatial information products provided by the Geospatial Information Agency of Indonesia.

- Developed product catalog, shopping cart, checkout, and order management features
- Integrated REST APIs and the Ministry of Finance's SIMPONI payment gateway.
- Built reusable Vue.js components and responsive interfaces.
- Supported end-to-end online transactions from product selection and ordering to payment and transaction tracking.
- Troubleshoot production issues and implement application enhancements based on user feedback.

Technologies:

Vue.js • Quasar Framework • JavaScript • Node.js • Express.js • Prisma ORM • PostgreSQL • Docker • Linux • Git • AI-assisted Development (ChatGPT, Claude)

MIAS Depok – Mosque Information System

Full Stack Developer

Website: <https://miasdepok.com>

- Designed and developed a full-stack web application to support mosque administration and community engagement.
- Built frontend using Vue.js and backend using Node.js & Express.js.
- Implemented authentication, financial reporting, donation management, and event management modules.
- Collaborated with backend engineers to deliver secure and reliable payment workflows.
- Managed Docker deployment, Linux server, Nginx, and PostgreSQL.

Technologies: Vue.js • Quasar Framework • Node.js • Express.js • Prisma ORM • PostgreSQL • Docker • Linux • Git • AI-assisted Development (ChatGPT, Claude)
